**Place this template  
in a separate layer  
in your layout program  
and delete or turn off  
before sending/exporting  
your file.**

#### **Margin**

For best results keep text and images that must be seen and read at least 1/8" from edge of page.

#### **Bleed**

For borderless edges, extend images, photos and/or solid background colors 1/8" beyond the edge of the page. This area (yellow) will be trimmed during the finishing process. It should not contain any information you intend to be seen or read.
